

Following on from the highly successful first event in this series, the Second International Congress on Drug Therapy in HIV Infection will take place at the Scottish Exhibition and Conference Centre, Glasgow, Scotland from 18–22 November, 1994. This meeting will consider current and future therapies in the treatment of HIV infection during a scientific programme which is structured around a series of non-competing sessions, giving all delegates the opportunity to attend all sessions. The Congress is co-sponsored by the Karolinska Institutet, Stockholm, Sweden, and The University College London Medical School (UCLMS), London, UK.

The focus of the Congress will be on key clinical issues in the treatment of HIV, allowing clinicians and clinical scientists to participate in active debate. Acknowledged international experts will present keynote review lectures. There will also be a comprehensive programme of oral and poster presentations selected from submitted abstracts in the following areas:

- Antiretroviral therapy
- Combination therapy
- Developing world
- Kaposi's sarcoma
- Opportunistic infections
- Paediatric issues
- Vaccines
- Viral resistance
- Virological and immunological monitoring of therapy
